COMPANY PROFILE

Born in 1971 in Montale, from the creativity and the craftsmanship of the Caso family, the Materassificio Montalese has grown over the years to become an entrepreneurial success. Today it covers an area of over 20,000 square meters and its daily production has increased over the years from about 40 to more than 3,000 mattresses today.

The Materassificio Montalese has gained a leading position in many foreign markets and continues to expand its presence in emerging markets. With its brand now it is present in over 40 countries worldwide.

A priceless heritage of craft skills, technical knowledge and technology that has been handed down from generation to generation, enriched with ever new and original content to reach the levels of excellence of our current products.

100% MADE IN ITALY

In order to guarantee the quality of a 100% Italian sleep, the Materassificio Montalese always creates and produces each mattress only within its Italian plants.

Creativity, passion, originality and innovation: our credentials to lead in markets all over the world. In order to improve the possible efficiency and quality of its products, the Materassificio Montalese has always placed great attention to automation and the development of new technologies.

Studies over the years have led to the delineation of a new technique that reduces the physical footprint and environmental impact of our mattresses: thanks to vacuum packaging, in fact, the mattresses reduce their volume by about 90%, making it extremely convenient storage, transport and distribution, with significant benefits for the environment.

But the real pride of the Materassificio Montalese is the uniqueness that the machines used have and give to each product. Internal digital printers for custom packaging, four-colour labelling machines for customization of the products Private Label and embroidery machines for custom labels: quality investments that have led the company to distinguish itself within the industry.
MISSION

The time devoted to sleep represents about one third of life. It is for this reason that no detail of the design, construction and finish of the mattresses of the Materassificio Montalese is left to chance. Every choice, every solution, every material used reflect a commitment to quality that only a company with craftroots can preserve in its DNA. To grow, improve and be able to offer the best, one needs clarity, synergy and above all respect.

Respect for the our land and its traditions, respect for our customers, suppliers, employees and consultants, and respect for the environment, have always been at the center of attention of our company, a strong base on which, day after day, the Materassificio Montalese has built its main values.

RESEARCH AND QUALITY

The department of Research and Development of Materassificio Montalese is constantly engaged in studying and implementing new methods and materials that, in addition to transfer in the mattresses the best of technological evolution, aim to take advantage of all the benefits of organic products through the use of essential oils of vegetable seeds and soy-based materials, to ensure a sound sleep in complete harmony with nature. In order to meet the needs of each buyer, Materassificio Montalese uses an innovative technology called Ergo Check, a particular test system of the comforts of products that, by analyzing the pressure exerted by the various body parts (with as many as 648 sensors) on different areas of the mattress, allows you to customize the capabilities of support depending on customer requirements.

The products of Materassificio Montalese can boast the highest standards of safety, ergonomics and environmental care. Among the main certifications of compliance and quality, enough to remember the Oeko Tex Standard 100, a certification that guarantees that the products do not contain or release substances harmful to human health, the LGA Pruf Zertifikat, the special 1IM of the Interior ministry for fire resistance, the BS (British Standard) 100 (UK) and 16 CFR 1632: 1991, 16 CFR 1633: 2006 (USA) certifications and the CATAS that, according to technical Italian, European and international regulations, certifies safety, durability, reactions and quality of all products. Our company is a licensee of the Woolmark brand, as well as of the certificates “MEDICAL DEVICE” Class 1 in accordance with Directive 93/42/EC, Ref Leg.DM332 - August 27, 1999. Some of our mattresses are made of ecological materials.
THE WELLNESS CULTURE

Sleep is an active phase of daily life that is essential for the whole body's equilibrium. It ensures the gradual recovery of the mental and physical energies expended during the day.

Having an uncomfortable mattress means sleeping an average of 1 hour less than people who sleep comfortably. According to studies, over the course of a single night a person shifts position 100 times on the average. The sleeping environment and the mattress we choose for our rest may actually reduce excessive movement and the resulting micro-awakenings, and symptoms of insomnia. In this regard, scientific research has drawn attention to the importance of choosing a good sleep system. Not only is it important to make wiser choices, but it should be taken into account that each individual mattress component contributes to the quality of the sleep and its continuity.

Experts agree: there is no perfect mattress. There is the mattress perfectly suited to individual needs. A mattress that can adapt to the body shape. A mattress that prevents the back from bending excessively and helps maintain proper posture during the night. A mattress that knows how to make the most of the applied technologies, innovative materials and systems. A mattress that combines quality and comfort in one great promise of wellbeing.
FABRICS

100% NON-ALLERGENIC FIBER

The non-allergenic fiber has many qualities, to sleep in total comfort and hygiene. It is resistant to mold, dust mites and microorganisms and is a great ally of the wellbeing of the night’s rest.

BAYSCENT®

The action of the microcapsules Bayscent®, active within the fabric, is based on an effective prevention. Contrary to traditional techniques involving the use of fragrances such as “smell covering products”, rarely effective and short lasting, the Bayscent® treatment helps to eliminate odors and gives the fabric a good clean scent. The treated fabric Bayscent® acts on 3 levels: first, it considerably lowers the vapor pressure of the odor, then neutralizes the bacterial degenerative action, by acting on the receptor, then refreshes the environment with a delicately scented odor. This treatment maintains the original quality of the fibers, allowing an effective perspiration of the body during sleep and its effectiveness is maintained for a long time. The version Bayscent® Aloe is also available, with microcapsules containing aloe vera essence with extraordinary beneficial properties (anti-inflammatory, analgesic and anti-oxidant).

AIR SPACE

An extraordinarily breathable fabric, used mainly on the lateral bands of the mattresses. A system based on maximum ventilation of the mattress so that the airflow is constant. It eliminates 100% all forms of moisture that might be created internally, allowing a healthier and relaxing sleep.

LYOCELL FIBER

An innovative fabric made of completely natural origin lyocell fiber. The result is a fabric completely sterilized and totally free from mold, bacteria and mites. It is also hypoallergenic because the treatment Medic+Area does not use any artificial chemicals, only natural products, for a highly hygienic use.
**BIOCELL 40 FUSION**

The antimicrobial and anti-static fabric par excellence, made up of a special Vicose fiber (40%), with an added percentage of silver and carbon. The silver ions, by binding with the enzymes of the cell of the microbe, inhibit its activity and multiplication, while keeping intact in time its antimicrobial function. Thanks to the radiant power (which conserves the heat generated by the human body) and reflective power (that is uniform distribution of heat itself to the outside) of silver fiber, Fusion is also able to regulate body temperature. The carbon, among all the elements, has the highest electrical conductivity. This feature allows to instantly dissipate the annoying electrostatic discharges that can accumulate during the night.

**JACQUARD**

This fabric, characterized by particular design and manufacturing, mainly used for different types of non-removable and non-washable mattresses, ensures a healthy and hygienic comfort.

**TENCEL®**

The fiber Tencel is made from pure natural cellulose that forms the main part of the plant cells. The starting material is wood and the production process is environmentally friendly and is completely biodegradable and eco-friendly in the subsequent processing. Like all natural fibers, to the touch, it offers a very pleasant sensation of softness. Comfort is also ensured by its excellent ability to pass the air and absorb moisture.

**100% NON-ALLERGENIC FIBER AND VISCOSE**

Soft as silk. This fabric is made of a special viscose fiber which is completely biodegradable. It looks like silk with a retention of rich, vibrant colours. This kind of fabric is extremely pleasant, soft and comfortable and gives you an extraordinary feeling of freshness and well-being. It absorbs moisture, is breathable and wear resistant.

**SUPER SOFT CASHMERE**

The Super Soft Cashmere fabric, thanks to the extraordinary effects of the exquisite material of the same name, is characterised by a one-of-a-kind softness, recognizable to the touch, able to complement your rest like a warm, soft embrace.
MATERIALS

BIO FOAM SOIA HR

Bio Foam Soia HR (High Resilience) that makes up the bottom layer of the plate, is made from a combination of natural untreated soy oil extracts, with water, and represents a perfect symbiosis between modernity and nature. Soybean oil has healthy and beneficial properties that lend elasticity to the material and a feeling of freshness, hydration and well-being while sleeping. The benefits of soy in this product give total well-being to the body and spirit. Bio Foam Soia HR has a low environmental impact. It is produced without the addition of uncontrollable blowing agents and partially replaces the synthetic products with natural elements.

CLIMA FRESH®

Climafresh® is the result of extensive research in nanotechnology, a new material with unique features and outstanding performance. The flexible memory foam is blended with microcapsules called PCM (Phase Change Material), the most advanced stage in the evolution of polyurethane performance. PCM, first used by NASA in the aerospace sector, is utilised wherever combining flexibility, breathability and heat exchange is needed. PCM absorbs the heat from the human body and maintains a constant internal temperature of the material, thus the memory foam acquires an extraordinary ability to remain cool, rather than warming as is typical with prolonged periods of human contact. Silver salts in the material composition render it resistant to bacterial and mold growth.

VISCO MIND®

The Visco Mind® is a self-shaping material of medium density (about 50 kg/m3) emulsified with water without the use of CFCs and with elastic memory. It is in fact a visco-elastic foam with strong ergonomic qualities, which conforms to the shape of the body slowly yielding, without any contrary pressure. It supports the spine properly, is antibacterial and hypoallergenic.

EXTRA SOFT FOAM

This unique material allows for performance technically superior to regular padding: it provides an extra-soft effect and is ten times softer than standard padding. It enhances the mattress, giving a special enveloping effect during rest. Recommended for those who love the feel of a soft product that is perfectly suited to the body’s shape, while maintaining the natural firmness of the mattress.
POCKET SPRINGS

The mattresses are equipped with numerous springs, each of which is contained in a bag. Each spring has therefore an excursion movement independent from the others to adapt perfectly to every single part of the body. It has 7 different areas of support, according to the hardness of different diameters of steel. Available the version with over 3000, 1500, and 900 springs in the double bed model.

VISCO MIND® HD

The Visco Mind® HD is a self-shaping material with elastic memory and high-density (about 95 kg/m³), much more than the normal Visco Mind ® (about 50 kg/m³). The molecules of the material are closely, stir together, this ensures a better grip of the body on the mattress, reducing even more the wrong pressure points. The high density has ensured the resolution to the problems that have long engaged specialists, and a finally effective remedy against several diseases (low back pain, neck pain) due to improper rest during the night.

WATERFOAM

The waterfoam is a polyurethane foam made from water, without addition of any harmful substances (CFCs), which promotes weight distribution allowing the relaxation of muscle mass. Available in many different variations of density and carrying capacity for a customized rest.

100% LATEX FOAM

The Latex is a substance extracted from the tree Hevea brasiliensis through an incision in the bark and collecting the milk that flows from it. The latex foam comes from the curing of the latex milk. This material is capable, according to several studies, to overcome many problems of allergies becoming increasingly common. The latex, due to its elasticity, has the ability to adapt point by point to each body position so that it is supported with clear advantages in terms of orthopedics.
Thanks to its qualities, the flax is still an innovative fiber: for the high hygroscopicity and the ability to allow the immediate absorption and evaporation of liquids, with rapid elimination of moisture and heat. The flax is universally known for its qualities of freshness and comfort. It can be washed very often and yet is non-deformable over time. It does not cause allergies because it promotes the natural exchange of heat and humidity, it is antistatic because it retains the electrostatic charges.

FLAX FIBER

This special material offers a technical performance higher than that of normal paddings: it gives indeed an extra soft effect and has a softness 10 times higher than that of normal paddings. It enriches the mattress giving a special wrapping effect during rest.

EXTRA SOFT FOAM PADDING

The camel wool has an excellent thermal insulation ideal for winter season. Its structure ensures a dry and extremely pleasant microclimate.

CAMEL WOOL PADDING

The non-allergenic fiber in the padding has many qualities, to sleep in hygiene and comfort. Resistant to mold and microorganisms, the non-allergenic fiber is a padding with high performance, a great ally of the night’s rest well-being. It is machine-washable.

INSULATING NON-ALLERGENIC FIBER PADDING

The Visco Mind® in the padding is a self-shaping material emulsified with water, without the use of CFCs and with elastic memory. It is a visco-elastic foam with strong ergonomic qualities, which conforms to the shape of the body and yields slowly, without any contrary pressure. It supports the spine properly, is antibacterial and hypoallergenic.

VISCO MIND® PADDING

The flexible memory foam is blended with unique microcapsules called PCM (Phase Change Material), which absorb heat from the human body and maintain a constant internal temperature of the material, thus the memory foam acquires an extraordinary ability to remain cool, rather than warming as is typical with prolonged periods of human contact. Moreover, thanks to the presence of silver salts in the composition of the material, the new memory foam is resistant to mould growth, able to preserve hygienic conditions over time.

CLIMA FRESH® PADDING
ERGO AIIR TECHNOLOGY

BREATHABLE, ELASTIC AND HIGHLY ERGONOMIC:
THESE ARE THE CHARACTERISTICS OF THE INNOVATIVE AIIR® LAYER.

BREATHABLE
A product unique in its kind that provides maximum comfort and breathability, reduces humidity and offers a pleasant feeling of freshness.

ELASTIC
The special manufacturing of the AIIR® layer:
• Renders the product extremely flexible and elastic
• Provides exceptional ergonomic support
• Supports body weight in the proper and optimal manner

ERGONOMIC
Thanks to the unique manufacturing with alveolar system, AIIR® layering is not only able to correctly support body weight, but also perfectly contours with the support frame. Ideal for frames with raised head/foot functions, as it allows for selecting the preferred position (cervical, back, femoral), while preventing the AIIR® from being altered when bent. It maintains the layer’s thickness, thus ensuring optimum rest.
MEMORY WATERFOAM
GENESI HD 3.0

MATTRESS THICKNESS: ABOUT 24 CM
LAYER THICKNESS: ABOUT 21 CM

FABRIC:
SIDE A – SIDE B: WHITE KNIT FABRIC 100% HYPO-ALLERGENIC FIBRE
MATTRESS BORDER: MICROFIBRE WITH HORIZONTAL HANDHOLDS OF MICROFIBRE

PADDING:
SIDE A: 100% HI-TECH FIBRE WITH EXTRAORDINARY ELASTICITY AND BREATHABILITY + 2 CM
VISCO MIND® CLIMA FRESH®, ERGONOMIC, SELF-MODELLING, THERMOREGULATOR AND
ANTIBACTERIAL – FIRMNESS 1.9 KPA
SIDE B: 100% HIGH-TECH FIBRE, WITH EXTRAORDINARY ELASTICITY AND BREATHABILITY

FEATURES:
FULLY REMOVABLE AND WASHABLE, WITH A DISAPPEARING ZIPPER. AERATOR IN CENTRAL
POSITION ON FOOT SIDE BORDER

NON-ALLERGENIC FIBER AND VISCOSE
CLIMA FRESH®
VISCO MIND® HD
BIO FOAM SOYA HR
REMOVABLE
INTERNAL LAYER:

- **TOP LAYER OF VISCO MIND® HD, ERGONOMIC, SELF-MODELLING, 7 DIFFERENTIATED FIRMNESS ZONES** – DENSITY 95 KG/M3 – FIRMNESS 2.3 KPA

- **LOWER LAYER OF BIO FOAM SOYA HR WITH UNTREATED NATURAL SOYA OIL EXTRACT, 7 DIFFERENTIATED FIRMNESS ZONES** – FIRMNESS 4.5 KPA HEAD AND THIGH SUPPORT INSERTS OF BIO FOAM WITH ESSENTIAL OILS TO FACILITATE SLEEP – FIRMNESS 3.8 KPA.
OLD FASHION 3.0

MATTRESS THICKNESS: ABOUT 26 CM
LAYER THICKNESS: ABOUT 20 CM

FABRIC:
SIDE A – SIDE B: BLACK JACQUARD FABRIC WITH “OLD STYLE” STRIPES.
MATTRESS BORDER: MICROFIBRE WITH HORIZONTAL HANDHOLDS OF MICROFIBRE

PADDING:
SIDE A: (WINTER SIDE) CAMEL HAIR + 2.5 CM EXTRA SOFT FOAM
SIDE B: (SUMMER SIDE) LINEN FIBRE, FOR A FRESH SENSATION IN CONTACT WITH
THE SKIN + 2.5 CM EXTRA SOFT FOAM

FEATURES:
FULLY REMOVABLE AND WASHABLE, WITH A DISAPPEARING ZIPPER. AERATOR IN
CENTRAL POSITION ON FOOT SIDE BORDER
INTERNAL LAYER:

- TOP LAYER OF VISCO MIND® HD, ERGONOMIC, SELF-MODELLING, 7 DIFFERENTIATED FIRMNESS ZONES – DENSITY 95 KG/M³ – FIRMNESS 2.3 KPA

- 1.5 CM – GREEN BIO FOAM HR WITH UNTREATED NATURAL OIL EXTRACTS – FIRMNESS 2.0 KPA

- 4 CM – ORANGE BIO FOAM HR WITH UNTREATED NATURAL SOYA EXTRACTS – FIRMNESS 3.8 KPA

- 1.5 CM – GREEN BIO FOAM HR WITH UNTREATED NATURAL OIL EXTRACTS – FIRMNESS 2.0 KPA

- LOWER LAYER OF BIO FOAM SOYA HR WITH UNTREATED NATURAL SOYA OIL EXTRACTS, 7 DIFFERENTIATED FIRMNESS ZONES – FIRMNESS 4.5 KPA
AMBITION HD 3.0

MATTRESS THICKNESS: ABOUT 28 CM
LAYER THICKNESS: ABOUT 23 CM

FABRIC:
SIDE A - SIDE B: KNIT FABRIC 100% HYPOALLERGENIC AND VISCOSE FIBRE, EXTRAORDINARY SOFTNESS
MATTRESS BORDER: GREY FABRIC 100% HYPOALLERGENIC FIBRE WITH HORIZONTAL HANDHOLDS OF MICROFIBRE

PADDING:
SIDE A: 100% HYPOALLERGENIC FIBRE + 2.5 CM EXTRA SOFT FOAM
SIDE B: 100% HYPOALLERGENIC FIBRE + 2.5 CM EXTRA SOFT FOAM

FEATURES:
COVER IS FULLY REMOVABLE AND WASHABLE. AERATOR IN CENTRAL POSITION ON FOOT SIDE BORDER
INTERNAL LAYER:

- 6 CM – TOP LAYER OF VISCO MIND® HD, ERGONOMIC, SELF-MODELLING – DENSITY 95 KG/M3 – FIRMNESS 2.3 KPA
- 8 CM – LAYER OF BROWN CFC-FREE WATERFOAM – FIRMNESS 2.4 KPA

- **7 CM – LOWER LAYER IN GREEN ERGONOMIC WATERFOAM, WITH ALVEOLAR SYSTEM, HIGH ELASTICITY, BREATHABILITY- HARDNESS 3.9 KPA**
AIIR PILLOW DREAM

MATTRESS THICKNESS: ABOUT 22 CM
LAYER THICKNESS: ABOUT 18 CM

FABRIC:
PILLOW TOP:
KNITTED FABRIC OF 100% HYPO-ALLERGENIC FIBRE
MATTRESS:
SIDES A AND B: BLACK KNITTED FABRIC OF 100% HYPO-ALLERGENIC FIBRE.
MATTRESS BORDER OF AIR SPACE FABRIC.

PADDING:
PILLOW TOP:
4 CM VISCO MIND®, ERGONOMIC, SELF-MODELLING
MATTRESS:
SIDE A – SIDE B: NONE

FEATURES: REMOVABLE ON 4 SIDES, WASHABLE
INTERNAL LAYER:

- **7 CM – UPPER LAYER** IN BROWN, ERGONOMIC WATERFOAM, WITH ALVEOLAR SYSTEM, HIGH ELASTICITY, BREATHABILITY - HARDNESS 2.4 KPA

- **4 CM – LAYER** IN BEIGE, ERGONOMIC WATERFOAM, WITH ALVEOLAR SYSTEM, HIGH ELASTICITY, BREATHABILITY - HARDNESS 4.1 KPA

- **7 CM – LOWER LAYER** IN GREEN ERGONOMIC WATERFOAM, WITH ALVEOLAR SYSTEM, HIGH ELASTICITY, BREATHABILITY - HARDNESS 3.9 KPA
100% LATEX FOAM
LOVELY LATEX 3.0

MATTRESS THICKNESS: ABOUT 26 CM
LAYER THICKNESS: ABOUT 18 CM

FABRIC:
SIDE A – SIDE B: 100% HYPOALLERGENIC FIBRE WITH “LUREX” DESIGN
MATTRESS BORDER: GREY FABRIC 100% HYPOALLERGENIC FIBRE WITH HORIZONTAL HANDHOLDS OF MICROFIBRE

PADDING:
SIDE A: LINEN FIBRE, FOR A FRESH SENSATION IN CONTACT WITH THE SKIN + 5 CM EXTRA SOFT FOAM
SIDE B: LINEN FIBRE, FOR A FRESH SENSATION IN CONTACT WITH THE SKIN + 2.5 CM EXTRA SOFT FOAM

FEATURES:
COVER IS FULLY REMOVABLE AND WASHABLE, WITH A DISAPPEARING ZIPPER.
AERATOR IN CENTRAL POSITION ON FOOT SIDE BORDER
INTERNAL LAYER:

- 18 CM – 100% LATEX FOAM WITH 7 DIFFERENTIATED FIRMNESS ZONES
BOX SPRING
SAINT BARTH

MATTRESS THICKNESS: ABOUT 31 CM
LAYER THICKNESS: ABOUT 21 CM

FABRIC:
PILLOW TOP: SIDE A: 100% HYPOALLERGENIC FIBRE WITH “LUREX” DESIGN
SIDE B: ANTIBACTERIAL JACQUARD FABRIC + MICROFIBRE FABRIC

MATTRESS: SIDE A: ANTIBACTERIAL JACQUARD FABRIC + MICROFIBRE FABRIC
SIDE B: 100% HYPOALLERGENIC FIBRE WITH “LUREX” DESIGN
MATTRESS BORDER: GREY FABRIC 100% HYPOALLERGENIC FIBRE WITH HORIZONTAL HANDHOLDS OF MICROFIBRE

PADDING:
PILLOW TOP: LINEN FIBRE, FOR A FRESH SENSATION IN CONTACT WITH THE SKIN + 2.5 CM EXTRA SOFT FOAM

MATTRESS: SIDE A: NOT PADDED SIDE B: LINEN FIBRE, FOR A FRESH SENSATION IN CONTACT WITH THE SKIN + 2.5 CM EXTRA SOFT FOAM
PILLLOW TOP INTERIOR: 3 CM VISCO MIND®, ERGONOMIC, SELF-MODELLING – FIRMNESS 1.9 KPA + 2 CM BROWN CFC-FREE WATERFOAM – FIRMNESS 2.4 KPA

FEATURES: COVER IS NOT REMOVABLE. AERATOR IN CENTRAL POSITION ON FOOT SIDE BORDER
INTERNAL LAYER:

- 3.5 CM – LAYER OF BROWN CFC-FREE WATERFOAM – FIRMNESS 2.4 KPA
- 14 CM – BUILT-IN BOX SPRING WITH ENCASED, INDEPENDENT SPRINGS DISTRIBUTED IN 7 DIFFERENTIATED FIRMNESS ZONES. DOUBLE BED APPROX. 900 SPRINGS, SINGLE BED APPROX. 400.
- 3.5 CM – BOTTOM LAYER OF BROWN CFC-FREE WATERFOAM – FIRMNESS 2.4 KPA
SAINT MARTIN

MATTRESS THICKNESS: ABOUT 31 CM
LAYER THICKNESS: ABOUT 21 CM

FABRIC:

- 3.5 CM – BOTTOM LAYER OF BROWN CFC-FREE WATERFOAM – FIRMNESS 2.4 KPA
PILLOWS
DUAL

DUAL NATURA

The visco-elastic memory pillow combined with a special orange Bio Soya Mind insert, is a revolutionary material that can adapt to weight and pressure offering in response an extraordinary comfort and provides a continuous air circulation for a maximum breathability. Natura pillow is covered with a knitted Probiotic fabric which uses active probiotic technology to inhibit the growth of bacteria and clean mite allergens. A concentration of technology that, while resting, helps to find harmony. Its ability to adapt to the head and neck, returning to its natural shape, without providing wrong points of pressure, guarantees an optimal rest.

DUAL CLIMA

The visco-elastic memory pillow combined with a special Climafresh® insert, is a revolutionary material that can adapt to weight and pressure offering in response an extraordinary comfort and provides a continuous temperature control and gives you a long and pleasant feeling of freshness. Clima Duet pillow is covered with a knitted Probiotic fabric which uses active probiotic technology to inhibit the growth of bacteria and clean mite allergens. Climafresh® is an innovative material which, thanks to the special Ultra Fresh treatment, absorbs heat from the human body taking on the capacity to keep cool and avoid the typical heating during rest.
DUAL

DUAL DRY MASSAGE

The visco-elastic memory pillow combined with a special beige waterfoam insert, is a revolutionary material that can adapt to weight and pressure offering in response an extraordinary comfort and provides gives you a long and pleasant feeling of freshness thanks to the special breathable cellular structure.

Dry dual massage pillow is covered with a knitted Probiotic fabric which uses active probiotic technology to inhibit the growth of bacteria and clean mite allergens.

BIO DOUBLE

Two sided pillow for a unique comfort. One side in Bio Memory, a material that can adapt to weight and pressure, able to self-regulate and self-shape for a new way to sleep. The other side in Extra Soft Foam, a very tough material but at the same time very flexible and soft. It gives you a long and pleasant feeling of freshness thanks to the special breathable structure.
SOYA

Innovative product based on a perfect union between technology and nature. Made using a special visco-Elastic Foam which adapts perfectly to the head and neck without offering contrary pressure, combined with a precious Soy-based material, which gives a pleasant softness and favours in a natural way the skin elasticity and hydration.

The visco-elastic bio memory is a material that can adapt to weight and pressure offering a unique comfort. These characteristics of total adaptability make it a leading-edge product, able to self-regulate and self-shape for a new way to sleep. A concentration of technology that, while resting, helps to find harmony. Its ability to adapt to the head and neck, returning to its natural shape, without providing wrong points of pressure, guarantees an optimal rest. This product is enriched with natural elements such as essential oils specifically used to assist sleep. Bio memory has a low environmental impact because it is produced without the use of uncontrolled foaming agents since it replaces part of synthetic products with natural products. It is also anti-mite and non-allergenic.

BIO MEMORY

BIO MOORE

BIO WAVE
SOFTGEL®

The Softgel® is a polyurethane material totally non toxic that does not harden and does not age. It has a great capacity of body pressure distribution, of temperature control and gives you a long and pleasant feeling of freshness.
